Call for Papers

Special Issue on:

Copyright in the Information Age

co-edited by *Manfred Holler* and *Marc Scheufen*

With the spread of the internet and the information and communications technologies, the ways of distributing information goods – such as music, movies, academic works, etc. – have dramatically changed. Obviously in this rapidly and continuously evolving and challenging environment, the institutional framework (especially the system of intellectual property rights) has been in transition ever since.

The effectiveness of a system for protecting works in the arts, literature and science sectors has meanwhile been under debate, forwarding recommendations that range from slight modifications in terms of the scope of copyright to advocates claiming a removal of copyright in certain special cases. The future role of copyright will decisively depend on our ability to cope with the challenges ahead.

This special issue of the Tafter Journal shall address these various challenges ahead and shall offer a careful and comprehensive analysis of copyright norms and its impact and implications for the legal, economic and cultural environment in the Information Age.

Suggested topics may include (but are not limited to) the following aspects:

- Copyright Piracy in the Digital Age
- History of Copyright
- Industry Analysis (Copyright for Music, Film, Books, Academic Works)
- International Copyright
- Impact of Digitalization on Information Management
- Creative Commons Licenses
- Open Innovation, Open Access and Open Source
